

Injectors Tested and Repaired within 24 hours.

TVED now offer a full testing and repair service for diesel fuel injectors normally within 24 hours.

Save time and money with our testing and repair service.

At TVED we can test fuel injectors, diagnose the faults and repair them, normally all within 24 hours!

Most major brands serviced.
Experienced technical staff.

Fast and reliable service.
Repairs normally completed within 24hrs.

Reduced waste.
Reduced costs.

Testing

TVED can now provide a complete testing service for the vast majority of common rail injectors from the leading manufacturers including Bosch, Delphi, Denso and Siemens. We can also test the opening pressure of the second stage in both Single and Double (2) spring injectors.

Our cutting edge test facilities allow us to measure both delivery and leaking fuel quantities.
